

Analog &
Digital Systems, Inc.,

ADS 300i & P100 ACCURACY. POWER.

The ADS 300i is designed and built from the ground up to be the most thoroughly thought-out and most carefully manufactured automotive speaker system available.

The 300i is musically accurate. Its power handling ability makes it possible to achieve high sound pressure levels even over engine and road noise. The basic configuration of the 300i allows it to be mounted where it sounds best yet take a minimum of space. It extends only one inch above the mounting surface. The combination of efficiency and high power handling make the 300i compatible with a wide range of amplifiers.

The ADS P100 uses digital technology to deliver 100 watts continuous power. The Power Plate meets the FTC and IHF home component standards for its claimed performance. Built-in equalization achieves the best possible bass performance with different types of speakers. Protection circuitry for both the amplifier and the speakers assures reliability without sonic compromise. The compact, functional shape of the P100 takes little room and facilitates mounting.

2203 S. BERETANIA ST. 941-5776

Considering its high power output, bass equalization and clean sound, the P100 is an outstanding example of State-of-the-Art performance.

You owe it to yourself to visit us and listen to the 300i and P100. Hear how ADS Automotive Components earned their reputation for quality and pace setting performance.
