N	- Novice	PAXTime	- PAX Adjusted Time
OA	- Ranking based on Best time	PAX	- Ranking based on PAXed Time
DNF	- Did Not Finish Run	DNS	- Did not Start
DNW - Did Not Work (No times will be recorded)			

The PAX Index is an autocross handicapping system designed to allow comparison between the various SCCA Solo II classes. The PAX numbers represent times that should be run by cars developed to the limit of the rules and driven by national caliber drivers. The PAX Index is updated each year to account for rule changes and is based on major events, including the SCCA Solo II Nationals, where there are plenty of fully prepared cars in the hands of top quality drivers.

To use the index, multiply a given time by the class index number to get an indexed time. For example, if a CS car runs a time of 43.500, its indexed time is 34.887 (43.500 x .802). If on the same course, an ASP car runs a time of 41.000, its indexed time is 34.932 (41.000 x .852). In this case, the CS competitor performed the best.

## Results for the Subaru WRX Driver Training School, August 5th 2001
