

The 200 hp Acura RSX Type-S delivers on the promise to improve on the outgoing Integra in every way. The sophisticated VTEC engine is smooth, powerful, and makes some of the best sounds this side of an NSX. I had an opportunity to drive this car on an autocross track at the introduction in San Francisco and a review is on my web page at www.satou.com. Check it out and please call me, Colin Sato, at Pflueger Acura 255-1255 for special offers for SCCA members and to arrange a test drive, you won't be disappointed!

Style to command the road

Performance to own it
