SCCA HAWAII REGION NEWSLETTER

February 1996

From the RE's Desk

Thanks to all who sent in their ballots for the Board of Directors election. I have been elected as Regional Executive, and Edward Kemper has been elected as Assistant Regional Executive. I plan to follow in M.G. Lewis' footsteps and they are mighty big footsteps, and offer SCCA members as much or more in the way of auto racing in Hawaii.

There are some new events on schedule for 1996, and we will need your participation in both assisting race events and participating in the

racing. I will be asking for assistance from our loyal members in any kind help they may be able to give.

As your new Regional Executive, I hope I can meet your expectations on what you want out of racing in Hawaii. Please feel free to contact me with your ideas.

Lindsey Akamu
Regional Executive
Hawaii Region, SCCA

Election of Board of Directors

The election for the Board of Directors were held in January 1996, and the members elected were:

Lindsey Akamu	Regional Executive
Edward Kemper	Asst. Regional Executive
Art Sonen	
Paul Schwartz	
Ed Hollman	

Jessie Weinberger and Chris Messer were not elected but they are very important to our organization, and I plan to appoint them to head a few departments.

The Hawaii Region has not operated with a Board of Directors before so we will have to learn how best to utilize the time and talents of our members.

Upcoming Events

For the month of March, we have our usual events and a special event. Our Solo II event is scheduled for Sunday, March 10. This is the end of the 1995 Solo II season, and we will be having the championship runoffs after the regular schedule.

The Regional Race on March 24 was to be a spectator event, but due to a number of circumstances, we decided to postpone the spectator event to the June 2 Regional Race.

Hawaiian Electric has asked for our assistance in staging a race at Hawaii Raceway Park for electric cars. These electric cars are the creations of several local high schools. As a climax to the building of the electric cars, Hawaiian Electric

wants to assemble everyone responsible to observe results of their creation. More information will be provided when available.

Another special event is the June 9 Solo II. We are organizing this race in conjunction with the ALOHA STATE GAMES. Those wishing to participate will have to register with the ALOHA STATE GAMES and the trophies, Gold, Silver, or Bronze medals, will be awarded. Tell your friends about this and make it a special event for all.
