Solo II

Race Results

We are looking for a couple of volunteers to help out during our autocross events. The areas we need help are in tech inspection and registration.

A Solo II tech inspector is responsible for the classification, and visual inspection of the cars for safety and mechanical condition before the race. The procedures are not difficult nor complicated. The volunteer will be allowed to autocross for free as compensation.

The registrar is one of our most important positions. It requires an early arrival, and is responsible for registration of drivers and visitors, and handling driver applications and fees. Because of the dedication involved, the volunteer will receive monetary compensation.

If interested, please contact M.G. Lewis or Linsey Akamu.

It has been brought to our attention that many Solo racers have not been following our scheduled heats. We have been lax in enforcing a two second penalty for running out of heat without permission. We will now enforce this penalty.

DECEMBER SOLO II CANCELLED

The military will be using our area in December, and we have no choice but to cancel the event.
